

# SUPERFAN

INTERACTIVE  
EXPERIENCE

## BRAINSTORM

come up with three different ideas of themes + interactive features

PHASE 0

### Idea 1: Kirby Themed

#### Theme

Kirby themed!!!!!! I'm going to add the different characters, the settings, and the bosses throughout the games. Music will vary as well.

#### Interactive JS Feature #1

Clinking on different sections of the page, such as clicking on the character page, will show you a variety of them, and a little description. Same as the boss page, and the different maps.

#### Interactive JS Feature #2

By clicking on the maps page, or the image of the maps, it will play different songs for each, depending on their boss.

### Idea 2: Ghibli

#### Theme

The different ghibli movies, and their characters. Also a little description/summary of each movie.

#### Interactive JS Feature #1

It will first lead you to the home page, and when clicking on a movie title, it will start to play its theme song, and show the characters.

#### Interactive JS Feature #2

When clicking on the description button, it will show a summary of the movie and the characters.

### Idea 3: Favorite Songs

#### Theme

My favorite music, and a preview of how they sound like, and the singers.

#### Interactive JS Feature #1

There will be different music covers on the page, and when clicking it takes you to a bio of the artist/singer

#### Interactive JS Feature #2

When clicking on the music button, the song will start to play.

## EVALUATE

think about the good and bad for each idea then choose one

PHASE 1

### Pros/Cons of Each Idea:

	Pros	Cons
Idea 1: Kirby Themed (Characters, music, maps, bosses)	<ul style="list-style-type: none"> <li>There will be variety of things to look at, and it'll be hard to get bored of it.</li> <li>I could organize them neatly, one section for characters, one for maps, and one for bosses, and also a homepage</li> </ul>	<ul style="list-style-type: none"> <li>The coding will probably be difficult, because of the amount of pictures I might put in.</li> <li>There might not be any good quality pictures</li> </ul>
Idea 2: Ghibli Themed (Characters, music, summary)	<ul style="list-style-type: none"> <li>The layout page will be in a simple, and it will be a sort of calming website.</li> <li>The music will be pretty easy to find (On YouTube), and the layout will be pretty basic</li> </ul>	<ul style="list-style-type: none"> <li>I still don't know how I want to lay it out</li> <li>It might be hard to find good images, or images with translucent backgrounds</li> </ul>
Idea 3: My Favorite Songs (Music, bio of singer/artist)	<ul style="list-style-type: none"> <li>The layout will be very simple, with the different music layout out on the homepage</li> <li>Easy to navigate, once you click it plays the music and you can see the descriptions</li> <li>It will talk about people from Japan and it might be interesting to learn from</li> </ul>	<ul style="list-style-type: none"> <li>The language is in Japanese so I don't know if some people may enjoy it or not</li> <li>The layout will be basic, where you only click the music cover and it takes you to a bio page or the singer/writer/artist/etc</li> </ul>

## CONTENT

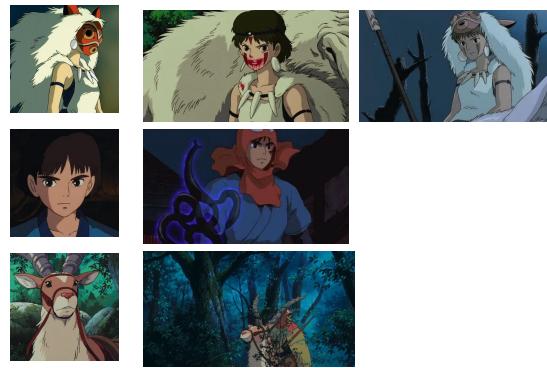

gather and edit essential content for your site

PHASE 2

Spirited away

Princess Mononoke

Castle in the sky

Howl's moving Castle

### Video links:

# DESIGN

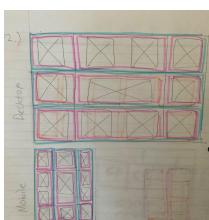

create three possible responsive designs for your chosen idea

PHASE 3

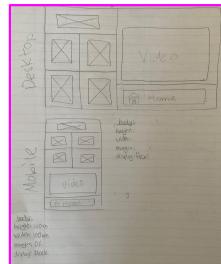

#1.)

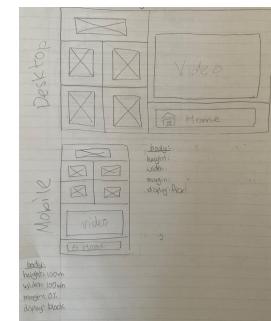

#2.)

#3.)

### Approved Homepage Screen &

### Javascript

# MOCKUP

choose your final layout and create a digital mockup

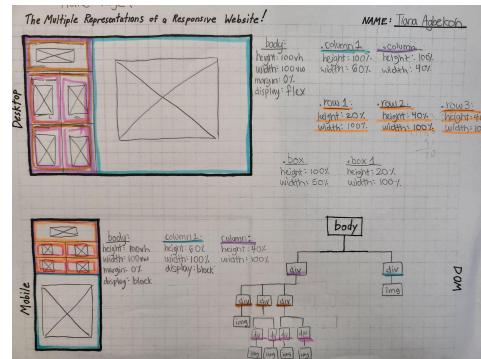

PHASE 4

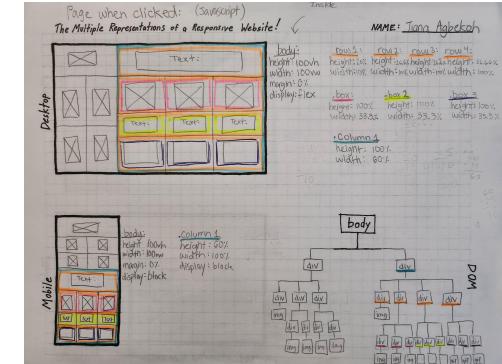

# ANNOTATE

add explanations, colors, percentages, and display properties + draw your dom

PHASE 5

Home Page

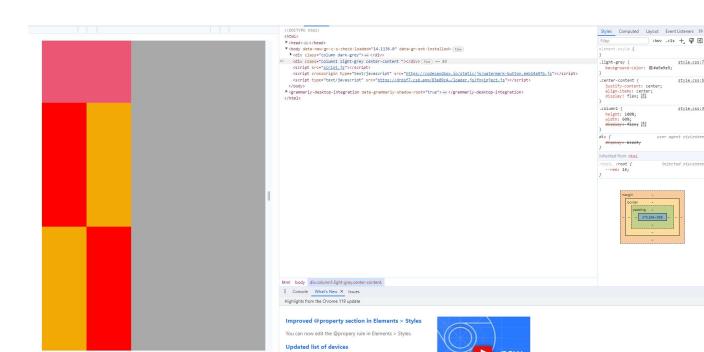

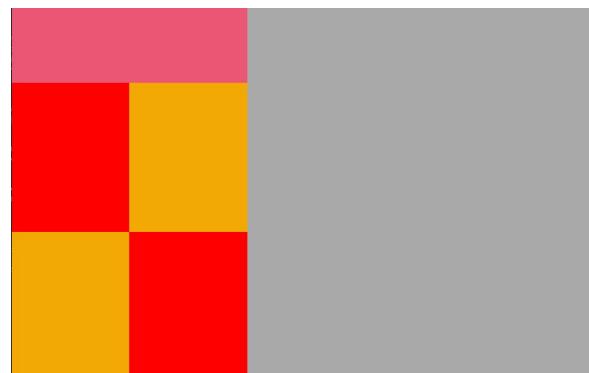

When click

# BUILD

create your desktop divs using html and css then make it responsive

PHASE 6

**CONTENT**

insert all images and text into your site

PHASE 7

Performance Insights

Improved property section in Elements > Styles

Updated list of devices

PHASE 8

# JAVASCRIPT

add behavior to your page by inserting two pieces of javascript

ENHANCE UX

add in effects when the user hovers and clicks to make the page intuitive and fun

Open Sandbox

PHASE 9

# TEST + ITERATE

*get feedback from users then make revisions to your user interface*

PHASE 10
